RE: Eversole Run Neighborhood, Section 8 (ERN-8) Preliminary Plat

Mr. Bodenmiller,

Terrain Evolution, as the agent for Jerome Village Company, acknowledges the existence of Pewamo soil within the development area of ERN-8. The soil types are commonly found within areas with poor drainage and/or in drainage courses. In this case, the soil is in two small areas along the perimeter of the site. Found in the rear of lots on the east side and along Hill Road mostly in roadside ditch area. This area will be open space and rear lots. Where in developed areas, the development will install storm sewer drainage system to provide adequate drainage to the area developed.

Section 416 of the Union County Subdivision Regulations designates areas with the said soil types as requiring improvements to render the area acceptable for the intended use. The subdivider is aware and acknowledges this requirement. The intended use is for single family residential. Providing adequate drainage system to the area shall remedy any poorly drained areas, thus rendering the area acceptable for the use. A storm sewer system is being designed to convey all surface runoff to stormwater management basins. Any and all subsurface tiles encountered during the construction of the development shall be connected to said storm sewer as to promote an adequate drainage system.

Please feel free to contact me if you have any questions at (614) 385-1092.

Sincerely,

Justin Wollenberg, PE, CPESC
Sr. Project Director
