This report was prepared in cooperation with the U.S. Department of Transportation's Federal Highway Administration, the Ohio Department of Transportation, and the local governments of Logan, Union, and Champaign Counties.

The preparation and publication of this document was financed cooperatively by the Federal Highway Administration, the Federal Transit Administration, the Ohio Department of Transportation, and the local governments of Logan, Union, and Champaign Counties.

The contents of this Plan reflect the views of the Logan-Union-Champaign Regional Planning Commission, which is responsible for the facts and the accuracy of the data presented herein. The contents do not necessarily reflect the official view and policies of the Ohio Department of Transportation or the U.S. Department of Transportation. This Plan does not constitute a standard, specification or regulation.

Introduction

The Logan-Union-Champaign Regional Planning Commission (LUC) was formed in 1967 primarily as a result of the announcement by Governor Rhodes and The Ohio State University Officials that the Transportation Research Center of Ohio would be located straddling the Logan and Union County Line. This 8100-acre facility was touted to be the world's largest automotive research center. Several studies indicated that a lot of growth and development would take place around the TRC, which would result in an influx of people, business, and industry. Therefore, local officials felt that a Planning Commission should be formed to start planning for the orderly development of the three counties.

LUC is charged under Ohio Law with certain responsibilities. Among them are the review and approval of subdivisions located in the unincorporated areas and the review and recommendation to township zoning commissions concerning zoning amendments. LUC also acts as an Area-Wide Clearinghouse for applicants who request federal and state assistance for selected projects. Assistance is rendered to township and municipal zoning and planning commissions regarding zoning and subdivision development.

LUC and several of its members have been actively involved in the attraction of new business and industry to the area and in the improvement of US Route 33, 68 and other infrastructure improvements. LUC is funded by villages, cities, and townships of the three counties and by the three counties themselves on a per capita basis.

In July 2013, the Ohio Department of Transportation (ODOT) initiated a Regional Transportation Planning Organization (RTPO) two-year pilot program with five multi-county planning organizations including LUC. This pilot program provided LUC with funding to conduct regional transportation planning in coordination with local stakeholders, Ohio Metropolitan Planning Organizations (MPO's), and ODOT. Federal transportation guidance encourages RTPO's to enhance rural area local governments' participation in "the planning, coordination, and implementation of statewide strategic long-range transportation plans and transportation improvement programs."

The initial focus of the RTPO planning program was to establish the first ever long range multi-modal transportation plans for these regions, develop transportation databases, and become knowledgeable about local government transportation funding programs. On January 27, 2016, Governor John Kasich formally designated LUC as an Ohio RTPO. This designation formalizes the program that started as a pilot and will help spur better and more informed transportation decision making in Ohio.

Although LUC covers three counties, the transportation planning boundaries in which LUC conducts transportation planning processes include Champaign County and Logan County.

As the RTPO continues to evolve from a pilot to permanent program, LUC realizes it needs to build its capacity as a transportation planning agency while continuing to deliver its core land-use related services. A partnership has been formed between LUC and the Clark County-Springfield Transportation Coordinating Committee (CCSTCC) to accomplish this. LUC retains its identity and local decision making as an RTPO while CCSTCC is contracted to perform transportation planning activities and interface with ODOT and FHWA.

CCSTCC has been conducting the metropolitan transportation planning process as the MPO for the Springfield urbanized area since 1964. The current staff has a broad mix of experience

across multiple transportation planning disciplines and will be able to provide that expertise to LUC and its staff. As an MPO, CCSTCC will be able to provide LUC with templates for many planning activities common between MPO's and RTPO's, including short and long range plans. These plans are captured in the work elements of this document. Both LUC and CCSTCC benefit from this interregional cooperation, and believe it can be a statewide model for sharing and bolstering resources.

As the RTPO, LUC will carry out the cooperative, comprehensive, and continuing transportation planning process via planning services provided by CCSTCC. LUC will maintain this planning process through the work elements developed annually in the Planning Work Program (PWP). The PWP describes the work necessary to maintain the transportation planning process and serves as the budgeting mechanism. The transportation planning process implemented through the PWP will be used to address the goals and objectives as defined in the 2015 LUC Long Range Transportation Plan:

Transportation Safety

- Improve and maintain safety of the roadway network, reducing the number of crashes in the area and striving to fall within the nation's average range of crash data.
 - Identify high crash areas
 - Identify traffic enforcement target areas
 - Create and implement a signage plan to assist in wayfinding, speed regulation, and traffic control
 - Evaluate existing signage for conformance to current standards in high crash areas (intersection and curves)
 - Establish a public service announcement system to reduce animal crashes during deer season

Network Connectivity, Reliability & Efficiency

- Evaluate and improve the highway network to promote safe, reliable, and efficient travel for all road users.
 - Evaluate crash data and traffic volume to identify areas of improvement
 - Evaluate the need for additional infrastructure at intersections with high traffic volumes
 - Assess local congestion and discuss infrastructure improvements
 - Perform feasibility study of congestion alleviation opportunities
 - Preserve and maintain the existing transportation network

Multimodal Access

- Improve and expand the public transportation network and non-motorized transportation options to allow easy mobility to all residents and visitors.
 - Create a comprehensive Bicycle and Pedestrian Plan for the two counties
 - Identify bicycle-pedestrian connections within activity centers such as schools, hospitals, shopping areas, universities, etc.
 - Evaluate trip data for current public transportation
 - Centralize all modes of transportation with one multimodal access hub

Economic Vitality

- Improve economic growth in the region by providing transportation options that support existing businesses and encourage new economic development opportunities.
 - Ensure that large manufacturing businesses in the region have adequate access to the freight infrastructure network.

- Facilitate the movement of goods into and out of the area and improve the mobility of all freight modes.

Stewardship

- Commit to the future and longevity of the transportation network by evaluating the social, environmental, and financial circumstances surrounding each project.
 - Address transportation priorities in a manner consistent with fostering social and environmental principles.
 - Develop a fiscally responsible plan and explore funding options to fund proposed transportation improvements.

Overview

The Regional Transportation Improvement Program (RTIP) is a four-year planning document developed to reflect the investment priorities of the Statewide Transportation Improvement Programs (STIP) for the LUC Transportation Planning Region. This document also serves to reflect the continuing, cooperative planning effort to advance the transportation needs of the region. It is a comprehensive and financially-constrained listing of regional transportation projects scheduled for implementation within the next four years. The program of projects included in the RTIP maintains a balance of local and regional needs and includes projects from all modes of transportation including highways, transit, rail, bicycles, and pedestrians.

The RTIP is developed at least once every four years in conjunction with the STIP development process and consistent with the long-range plan. During rural consultation, which is an important step of the STIP/RTIP development process, LUC serves as the regional voice to coordinate and identify regional transportation needs for consideration of inclusion in the STIP and RTIP. LUC continues the coordination with ODOT and the MPO's within the region to provide a comprehensive RTIP document that is made available for public comment during the STIP/RTIP Public Involvement Period. Public comments are addressed and coordinated within the RTIP. The final RTIP is adopted by the LUC Executive Committee and then included in ODOT's STIP by reference.

Project Information

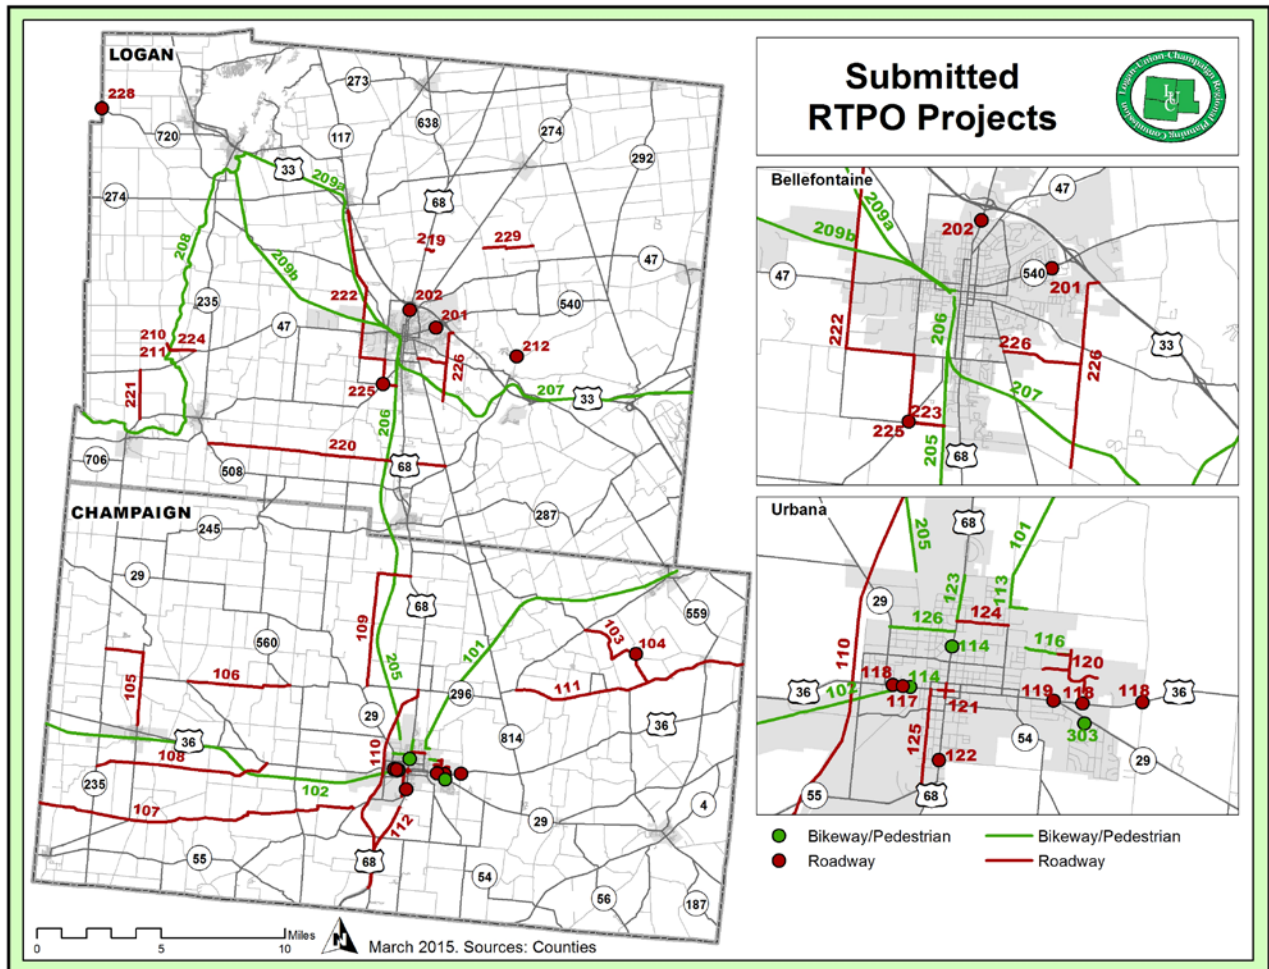

There are specific federal and state requirements for projects to be included in the STIP and TIP. US DOT requires all projects to be financed whole or in part with federal surface transportation funds, projects requiring a federal approval action, and other regionally significant projects to be included. All projects must also be consistent with Ohio's Long Range Transportation Plan. Additional information may be found in Title 23 Chapter 1 Subchapter E Part 450 of the code of federal regulations.

Statewide Line Item (SLI) Grouped Projects

Projects not considered to be of appropriate scale for individual identification in a given year may be grouped by category or program. These projects are grouped and identified in the STIP and TIP's as Statewide Line Item (SLI) Grouped Projects. The projects utilizing SLI's are non-controversial in nature, have an air-quality status of exempt, and have a negligible environment impact. The grouped project list is a fluid document and is for informational purposes only. Title 23 Chapter 1 Subchapter E Part 450 Subpart B §450.218 (j) may be referenced for the provision of grouped projects in the STIP/RTIP as named by ODOT.

Unfunded RTPO Projects

LUC does not directly distribute ODOT funds as part of the RTPO program. However, as part of LUC's 2015 LUC Regional Transportation Plan, projects from around the region were submitted by Champaign County, Logan County, City of Bellefontaine, City of Urbana, and Simon Kenton Pathfinders. Each project was ranked using six categories and a corresponding point system: Safety, Service Improvements, Freight/Economic Development, Functional Class, Transportation Choices, and Environmental Justice. For an expanded examination of these unfunded regional needs, see the 2015 LUC Regional Transportation Plan. The list should be considered a fluid document.

provide any comments. Eleven people attended the Rural Consultation, but no comments were received.

SFY 2021-2024 Rural Consultation Meeting

Rural consultation is the process by which the Ohio Department of Transportation (ODOT) engages non-metropolitan area local elected officials in the development of the:

- Statewide long-range transportation plan
- Statewide Transportation Improvement Program (STIP)
- Other modal, corridor, or regional planning studies
- Project selection and funding processes

Consultation with non-metropolitan area local officials ensures that ODOT's transportation planning and project decisions reflect the needs of Ohio's rural areas and contribute to the economic growth and quality of life in these regions.

The Logan-Union-Champaign Regional Planning Commission (LUC) along with the Clark County-Springfield Transportation Coordinating Committee (TCC) will be hosting the 2019 Statewide Rural Consultation Meeting for SFY 2021-2024.

Who Should Attend: County Engineers, County Commissioners, Township Trustees, City and Village Mayors, Engineers, Councils, Public Transit Operators, Port Officials, Sheriffs, other local safety responders, etc.

When: 10/2/2019
Time: 2:30 - 4:30 pm
Where: LUC Regional Planning Commission
 10820 St. Rt. 347
 East Liberty, OH 43319

Staff from LUC and TCC will be on hand to discuss projects and take comments. Project lists and maps will be available.

CLARK COUNTY-SPRINGFIELD
TRANSPORTATION COORDINATING COMMITTEE

The STIP/TIP Public Comment Involvement Period was from March 30 through April 10, 2020. A public open house was scheduled following development of the RTIP; however the evolving situation with the COVID-19 pandemic that occurred at this time forced the cancellation of the in-person public component of the open house due to concerns with the public's health and safety. A teleconference number was provided in conjunction with the posting of the exhibits and a presentation on LUC's website. The public comment period was advertised in the Urbana Daily Citizen and the Bellefontaine Examiner, along with fliers hung in several government buildings and a mailing/email sent to several stakeholders including local governments and providers of transit services. Four people attended the teleconference and one comment was received during the public comment period. The draft document, along with maps were posted on LUC's website for review and comment.

Summary of the written public comment received for the draft FY2021-2024 RTIP:

- Comments on the goals and objects from the 2015 Long Range Transportation Plan suggesting the inclusion of the Champaign County Safety Plan and US68 & SR31 Operation Improvement Study/Strategic Plan
- The Highway Project List included a project from Auglaize County
- The Transit Project List does not include Champaign County projects
- General formatting comment regarding the Executive Committee Officers

Environmental Justice

In 1994 Executive Order 12898 Environmental Justice (EJ) included identifying and addressing the effects of all programs or activities of Federal-aid recipients, sub-recipients, and contractors, whether or not such programs and activities are federally assisted.

Executive Order 12898 was created to bring Federal attention to the environmental and human health conditions in low-income and minority communities with the goal of achieving EJ. The goal of Environmental Justice is to ensure that any adverse human health or environmental effects of any government activities do not disproportionately affect minority or low-income populations. EJ does not intend to provide preferential treatment to these populations, but rather fair treatment to all populations. Specific to transportation, Executive Order 12898 has been issued in order to ensure that all federally funded transportation-related programs, policies, and activities that have the potential to cause adverse effects, specifically consider the effects on minority and low-income populations. EJ is a public policy objective that has the potential to improve the quality of life for those whose interests have traditionally been overlooked.

According to the United States Department of Transportation (USDOT), there are three core principles of Environmental Justice:

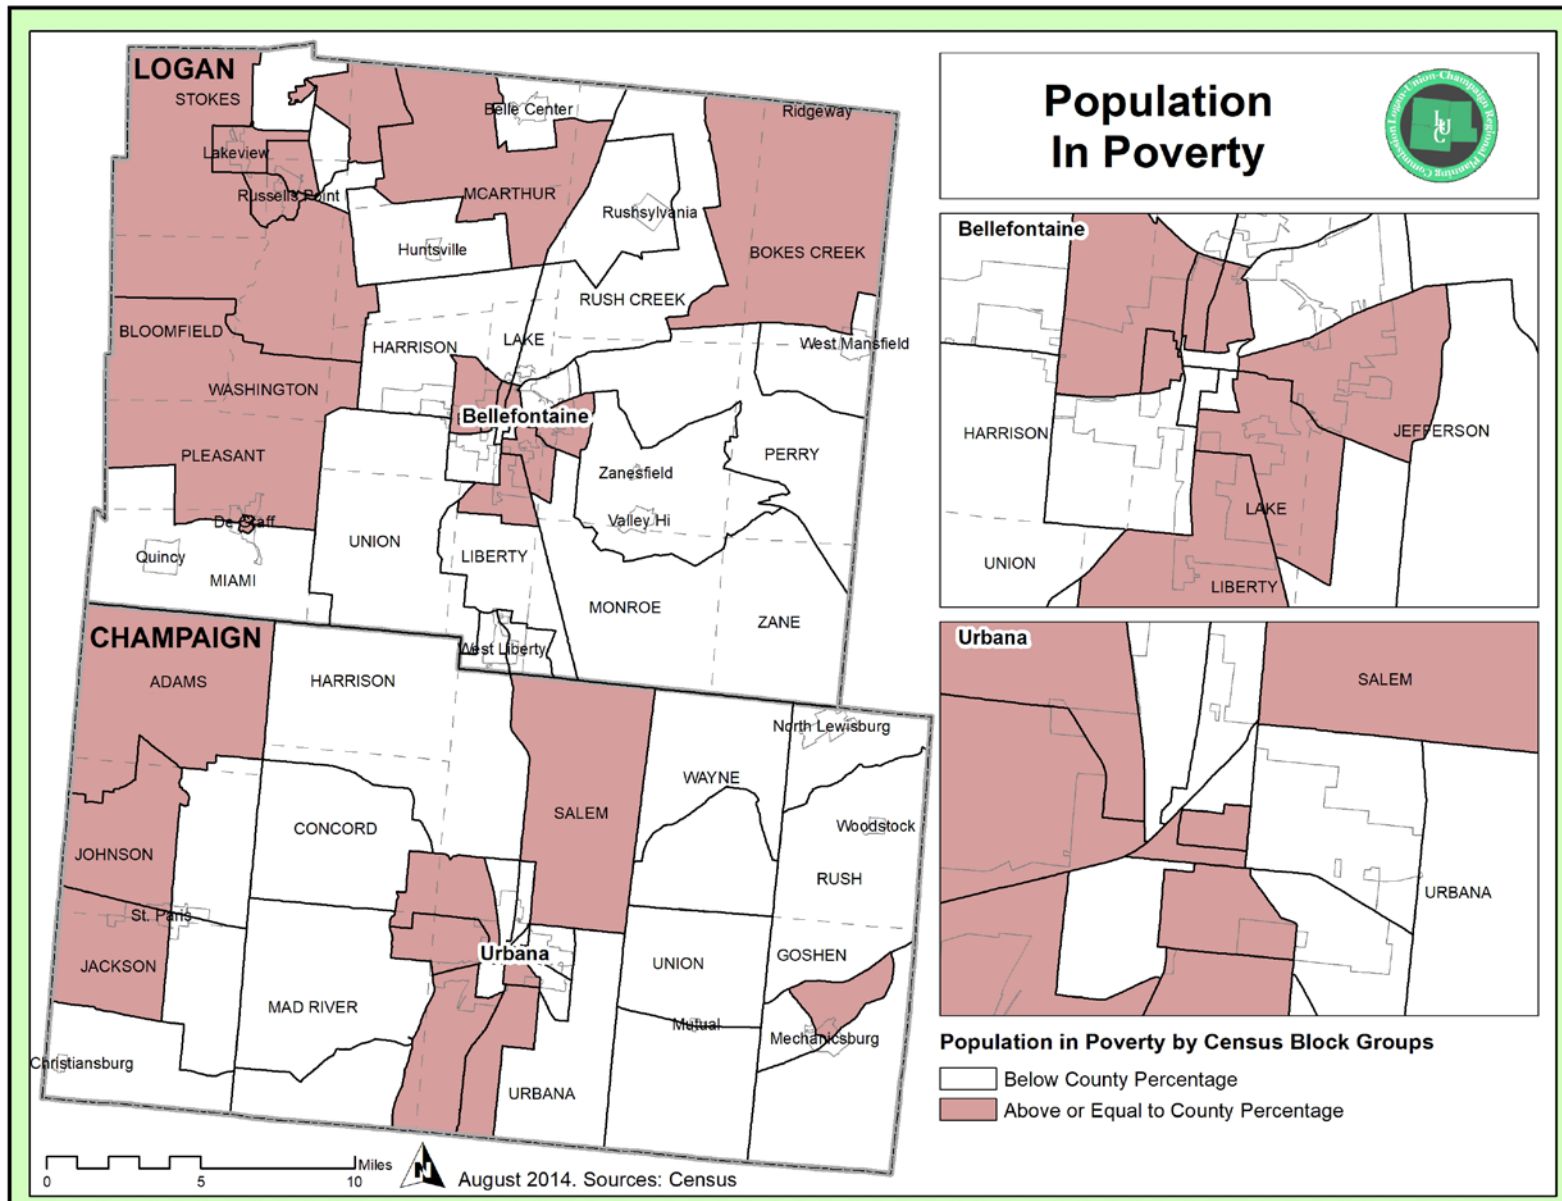

- To avoid, minimize, or mitigate disproportionately high and adverse human health or environmental effects, including social and economic effects, on minority and low-income populations.
- To ensure the full and fair participation by all potentially affected communities in the transportation decision-making process.
- To prevent the denial of, reduction in or significant delay in the receipt of benefits by minority and low-income populations.

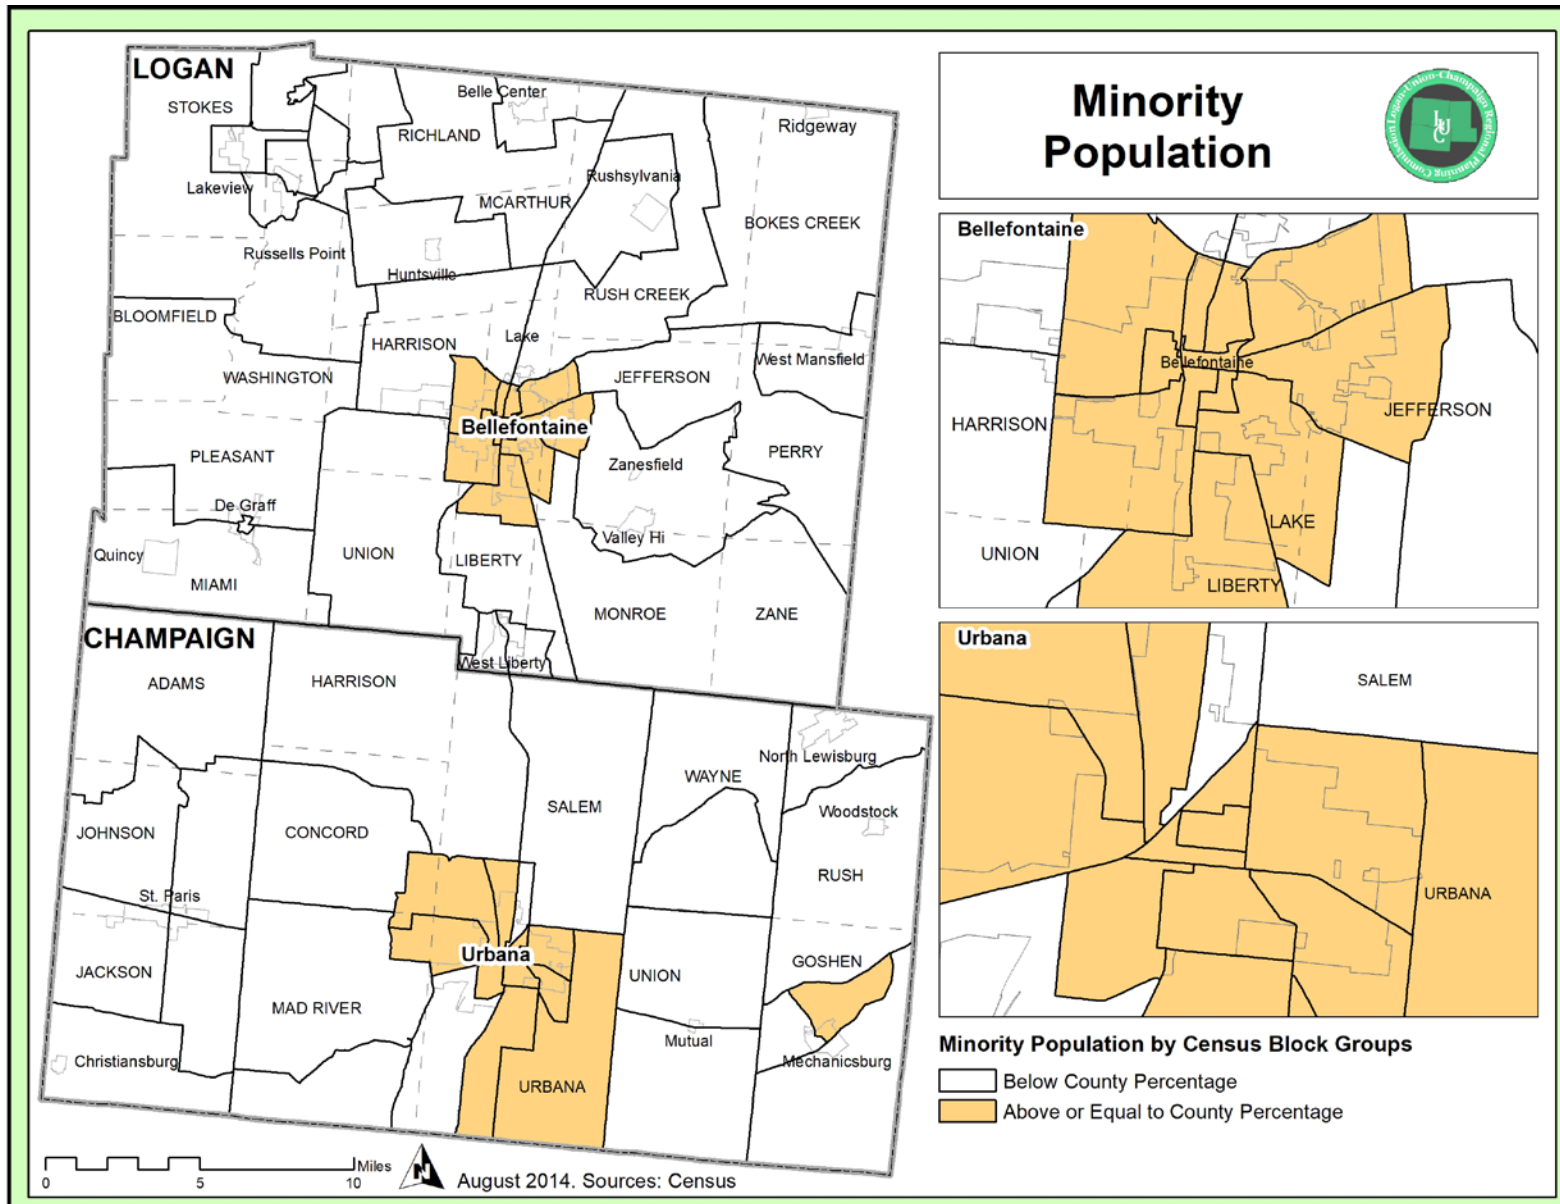

As Logan-Union-Champaign Regional Planning Commission, the LUC Transportation Plan and RTIP must address EJ concerns. Addressing Environmental Justice concerns includes:

- Identifying low-income and minority populations so that their needs can be identified and addressed and that the benefits as well as the burdens of transportation investments can be fairly distributed throughout the planning area.
- Enhancing existing analyses processes to ensure that the Transportation Plan and RTIP comply with Title VI requirements.
- Evaluating the existing public involvement processes and improve if necessary to include minority and low-income populations in the decision-making process.

Type of Project	Total Number of Projects	Number of Projects in an EJ Protected Population Area	Action/Comments
Resurfacing or Reconstructing	0	0	N/A
Bridge Rehabilitation or Replacement	0	0	N/A
Air Quality Awareness Program	0	0	N/A
Bicycle and Pedestrian	0	0	N/A
Enhancements	0	0	N/A
Safety and Signals	0	0	N/A
Railroad	0	0	N/A
Totals	0	0	

As all the projects located in the LUC region are Statewide Line Item (SLI) Grouped projects, there are no impacts to the EJ protected population area.

Fiscal Constraint

For a project to be included in the TIP and STIP per federal regulations, reasonable fiscal constraint must be maintained. Fiscal constraint is maintained by keeping estimated transportation improvements within identified budgets. As LUC does not currently receive suballocated funding, the Ohio STIP addresses fiscal constraint for the RTPO program.

Regional Funding Overview

The below tables provide an overview of the funding anticipated for the projects planned in the SFY2021-2024 STIP period for the Logan-Union-Champaign region.

Summary of Highway STIP Estimates for LUC Region in 2021 - 2024
